Professional Summary

Computer Science undergraduate with a CGPA of 9.1 and strong foundations in Data Structures Algorithms, Machine Learning, Object-Oriented Programming, DBMS and Computer Networks. Proficient in Python, Java, C++, SQL, Flask and React with hands-on experience developing AI, NLP and full-stack applications. Passionate about Generative AI, Large Language Models, backend development and intelligent automation, with a strong interest in building practical AI-driven software solutions.

Education

Dayananda Sagar College of Engineering

Bachelor of Engineering — CGPA: 9.1

2023 – Present

Bangalore, India

Presidency PU College

PU Board Examination — Percentage: 96.67%

2021 – 2023

Sira, India

Projects

CareerMate – Placement Management System | React, Flask, MongoDB, JWT

- Developed a full-stack placement management web application to help students track job applications, resumes, and interview schedules on a unified platform.
- Implemented secure JWT-based user authentication and complete CRUD operations for managing job applications and interview records using React, Flask, and MongoDB.
- Built a Resume Manager supporting PDF uploads and designed a responsive dashboard displaying real-time placement statistics and upcoming interviews.

AI-Based Smart Waste Management System | Python, Deep Learning

- Developed an AI-based waste classification system using Python and Deep Learning techniques.
- Applied image processing methods to automatically classify different categories of waste.
- Designed to support efficient waste segregation and promote sustainable waste management.

AI Based Toxic Comment Detector | Python, NLP

- Built a machine learning-based text classification system to identify toxic comments.
- Performed text preprocessing using Natural Language Processing techniques before model training.
- Designed to automatically classify harmful online comments for safer digital interactions.

Silent Zone Detector | Android Studio, SQLite

- Developed an Android application that automatically switches the phone to silent mode in predefined locations.
- Integrated SQLite database to store and manage user-defined silent zones.
- Designed a simple and user-friendly interface for managing silent locations.

Technical Skills

Programming Languages: Python, Java, C++, SQL

Core Subjects: Data Structures & Algorithms, Object-Oriented Programming

CS Fundamentals: Operating Systems, Database Management Systems, Computer Networks

Web Development: HTML, CSS, JavaScript, Flask (Basics), React

Database: MySQL, MongoDB, SQLite

Cloud: Google Cloud Platform (GCP), Cloud Computing Fundamentals

Tools: Git, GitHub, VS Code, Android Studio

Coding Profiles

- **LeetCode:** Solved 60+ DSA problems across Arrays, Strings, Trees and Graphs.
- **HackerRank:** Regular coding practice in Problem Solving and Programming.

Certifications

- Google Cloud Career Launchpad — Computing Foundations Track
- Python for Data Science — NPTEL
- Computer Networks — Cisco Networking Academy
- Information Security A-Z — Infosys Springboard
- Web Development — Code With Harry

Achievements

- Secured a **CGPA of 9.2/10** in Bachelor of Engineering.
- Solved over **100+ DSA problems** on LeetCode.
- Consistently practice coding and problem solving on LeetCode and HackerRank.
